OVERSIZE LOAD SIGN

*Pilot Car Specialized
Products*

Tel: 484.722.4800

Features & Benefits

The OVERSIZE LOAD sign concept of Blazing Technologies Inc. was designed by pilot car operators in order to replace the inferior models on the market today. Most are made of plywood and plastic and once mounted remain in place on your vehicle until they wear out. The BTI OVERSIZE LOAD sign will not wear out and is powder coated twice to withstand the elements.

Two versions of the mounting frame exist, a side mount and a cross bar mount designed to attach to most automobile luggage racks.

Current owners of the BTI OVERSIZE LOAD sign will tell you that there is a world of difference in gas mileage alone between using an old wooden sign that remains upright all the time and using the BTI OVERSIZE LOAD sign which can be folded down to reduce wind drag.

THE OVERSIZE LOAD SIGN EASILY FOLDS DOWN WHEN NOT NEEDED AND IS PINNED IN PLACE.

Design & Warranty

- All metal constructed—available in either steel or aluminum—heavy duty design—built to last.
- Folds down when not required and made of expanded metal which allows air to travel through the sign to reduce wind resistance and help improve gas mileage.
- All steel constructed with laser cut lettering attached to stainless steel expanded metal on the steel signs and aluminum expanded metal on aluminum signs to reduce wind drag.
- Superior Quality and Workmanship
- Powder coat top coat with zinc primer powder coat below to create a long lasting, weather resistant finish.
- Made to attach to the luggage racks of most vehicles. Two versions of mounting frame - either side mounted or cross bar mounted
- Optional Flag holders can be purchased that mount to the bottom of the sign or to the optional light bar mounting bracket.
- Standard Sign is 60 inches wide by 14 inches tall, Letters are 10.5 inches tall.

Design & Warranty

- 1183000007—Cross Bar Luggage Rack Mount Steel OSL Sign
